

Madhari Sai Santosh

Ai-UX Designer

About me

Results-driven UX Designer with **3+ years of experience** designing intuitive web and mobile experiences. Skilled in user-centered design, wireframing, prototyping, usability testing, and cross-functional collaboration to deliver scalable solutions. Proven ability to improve usability, streamline workflows, Blending UX design with AI assistants, automation, and orchestration, I design interactions that guide users, reduce confusion, and build trust.

Experience

- Tata Consultancy Services (Oct 2022-Present)
- Conducted heuristic evaluations and UX audits to identify usability gaps and improve enterprise workflow efficiency.
 - Redesigned internal customer platforms with user-centric dashboards and streamlined estimation workflows, reducing task time and improving visibility.
 - Delivered UX solutions for TM System (TMS), enhancing resource tracking and operational clarity.
 - Drove an 80%+ reduction in recurring application issues through strategic UI improvements, decreasing employee-raised tickets by 50%.
 - Rebuilt the Enterprise Search experience, designing a structured “All Results” page that improved hierarchy, reduced chaos, and resolved search usability challenges.
 - Created prototypes and design specifications in Figma/XD, collaborating cross-functionally to align UX strategy with business goals.
 - Contributed to the Design System by building scalable icon libraries and interaction states, ensuring consistency and accessibility.
 - Used analytics, user feedback, and UX best practices to continuously optimize usability and satisfaction.
